

PURE CARE

SUPERIOR SOLUTIONS TO SIMPLIFY POOL CARE

PUREX
Pool and Spa Chemicals

ELEMENT

BEST for removal of unwanted metals from pool water

- Proven removal of unwanted metals from pool water
- Ability to control Calcium and Magnesium scale and staining
- Anti-microbial properties
- Low toxicity

How to use

Add 500ml per 40,000 litres of pool water. Dilute in a bucket of water and add to the deep end of the pool with the filtration system in operation. For fresh stains use 1 litre to 40,000 litre of pool water.

120mls per 40,000 litres added to the deep end on a weekly basis. Do not let the pool water pH fall below 7.0 or corrosion problems may result. For scale prevention it is also essential to maintain pH at 7.2 to 7.6, Total Alkalinity at 80-125ppm and Calcium Hardness at 175-250ppm.
