- ✓ **Automatically sanitises your pool**
- ✓ **Can operate 24/7 independent of pump**
- ✓ **Saves money**
- ✓ **Easy installation**
- ✓ **1 year warranty**

KX Siesta Salt Chlorinator

Sit back and relax, the KX Siesta Salt chlorinator automatically chlorinates your pool, saving you time and money.

AstralPool has designed and made a salt chlorinator specifically for above ground pools. Easy to install and sized perfectly for most above ground pools up to 50,000 litres, the KX Siesta Salt Chlorinator is the most convenient way to eliminate the daily chore of manually adding chlorine to keep your pool in a pristine and healthy condition.

The KX Siesta is simply installed underneath the coping of your above ground pool and the cell plates submerged in the pool water. A mild concentrate of salt is dissolved into your pool water. The salt is then converted into chlorine as the water comes into contact with the KX Siesta Cell Plate. The chlorine is distributed throughout the pool though natural convection of the KX Siesta when the pump and filter system is turned on.

As the chlorine is distributed it kills contaminates in the water, resulting in pure crystal clean water. The chlorine then turns back to salt completing the cycle. Salt is only required after diluting the pool with fresh water.

The KX Siesta requires no special installation and operates automatically. Simply add the required amount of salt, install the KX under the pool coping and turn on. Weekly or bi weekly cleaning of the KX Siesta replaces the daily chore of adding chlorine.

The KX Siesta Salt Chlorinator is cover by a 1 year limited warranty.
