# MAX+ Robotic Cleaners

Robot Pool Cleaners make perfect sense in today's energy efficient world. The MAX+ series pool cleaner is the latest revolution in cleaning technology. 4WD propulsion ensures the cleaner navigates the most difficult pools, while the high speed brush scrubs the pool surface. The top access self contained inbuilt filters collect large debris and reduces the load on your conventional filter, decreasing backwash frequency and saving expensive chemicals and water top up. Energy costs for your cleaning system are reduced to as little as \$10.00 per year.

The MAX+ Series Robot Pool Cleaners incorporate the award winning, AquaSmart System. With a built-in gyroscope improves balance and pool surface coverage, eliminating cable tangling. Designed by one of Europe's best design houses, it looks smart and is easy to use. The easy to remove filter cartridges are simple to clean, and enable easy viewing of the collected debris, even during operation.

When not in use, it's simple to remove and stow the MAX+ so that your pool is ready to use at any time without swimming around cumbersome pool cleaner hoses. The MAX+ is so efficient at cleaning it will only need to be operated once or twice a week in most swimming pools.

The MAX+ 3 and MAX+ 5 Cleaners allow you to optimise the use of your variable speed energy efficient pump because they operate totally independently of the filtration system. This allows your

energy efficient pump to operate at the lowest speed without having to drive a suction cleaner which uses more energy.

The MAX+ 3 is designed for floor cleaning. For the ultimate pool clean the MAX+ 5 cleans both the floor and walls. Both the MAX+ 3 and 5 cleaners come with grooved PVA wheels which are ideal for all pool surfaces providing excellent adherence and durability.

## EASY INSTALLATION

Simple instructions then plug and play

## AQUASMART SYSTEM

Electronic swivel system to eliminate cable tangling

## LIGHT

Light weight with large drain outlets that enable fast discharge of water means the MAX+ is easy to take out of the pool

## MAX+ SCRUBBER

Fast moving brush scrubs the pool and helps remove debris

## EASY-VIEW

Transparent windows for seeing the level of dirt in the filter even when it is working

## EASY CLEAN

With a filter that enables quick and easy cleaning without coming into contact with the dirt

## EASY OPEN

Direct access to the filter by just lifting the handle. No need to open the covers, turn the cleaner upside down or press any buttons

## 4WD

4WD helps navigate difficult pools and obstacles such as suction and main drains

## FLOOR & WALL

Cleans the floor and the wall of the pool (only available for MAX+ 5)

## MAX+ 1 Cleaner

The MAX+ 1 cleaner is the latest development in Robot Cleaners and provides an economical option for the budget conscious pool owner. The MAX+ 1 has a single motor that creates waterflow and 'jets' the unit around the pool. It offers a great alternative to Suction or Hybrid cleaners which require a connection to the pool pump and use significantly more energy and waste more water. A simple lever on the front of the unit enables adjustment of the cleaner direction so that it works in virtually any shape pool up to 12 metres in length. Simple to install and able to be set-up perfectly for your pool, the MAX+ 1 gives you all the benefits of Robotic Cleaners at a great price.

\* MAX+3 and MAX+5 only

### Warranty

The MAX+ Robotic Cleaners are covered by a two year warranty.
