 FLUIDRA GROUP

Pandora Robotic Pool Cleaners

- ✓ **Reduced consumption of water care agents**
- ✓ **Plug and play**
- ✓ **Improved water quality**
- ✓ **High suction capacity**
- ✓ **Reduced workload on pool filter**

Pandora Residential Cleaners

Environmentally friendly, the Pandora units clean almost any size and shape residential swimming pool. The ultra modern high speed motors and ultra fine inbuilt filtration bag combine to make a highly effective pool cleaner and vacuum appliance.

The Pandora pool cleaners are fully independent and work without any suction hoses or hook up booster pumps.

With no installation, no supervision and with minimal maintenance the Pandora cleaner is your perfect choice. Plug the unit in, drop it into the pool and turn it on. When the cleaning cycle is over, Pandora will turn itself off automatically.

The Pandora pool cleaner saves water by incorporating its own 2 micron filtration bag. By using the Pandora cleaner the workload on the pool's filtration system is reduced which saves on water consumption, chemical loss and heating costs.

Pandora pool cleaners automatically detect, scan and map out your pool providing a ultra efficient scrubbing, cleaning and vacuuming solution for your pool.

The Pandora residential cleaners are covered by a two year warranty.
