# RT Robotic Cleaner

Environmentally friendly, the Astralpool RT Robotic Cleaner cleans and scrubs almost any size and shape residential pool. Utilising the latest pool mapping and positioning technology (Gyro) and combined with the unique aquasmart software, the Astralpool RT robot cleans the average size swimming pool in 1.5 hours and costs as little as 8 cents to run.

Cleaning wall and floor, the in-built top access debris canisters capture fine debris down to 2 microns and helps reduce the load on your filtration system. This in turn reduces the need for constant backwashing saving you both time and money, not to mention the benefits of helping reducing water waste.

The RT Robotic Cleaner also helps circulate pool chemicals consistently around the pool ensuring the available chemicals are utilised most effectively and can also help circulate heated pool water throughout the entire pool making the heating of your pool more efficient.

Robotic pool cleaners offer most benefit when operated at night after the days swimming and

filtration activity has ceased. Simply drop the cleaner in before you go to bed and the cleaner will run its cycle, turn itself off and await the next cleaning cycle.

All Astralpool Robotic Pool cleaners can be programmed via external timers to clean when it suits you.

The RT Robotic cleaner is best suited to pools with a width of 3.5 meters and wider and a maximum length of 12 metres. For pools narrower than this the AstralPool RPX Robotic cleaner is recommended.

The Astralpool RT Robotic cleaner is just one of six new Robotic cleaners available, one of which will most definitely suit your swimming pool.

Model	Cycle Time	Wall Cleaner	Recommended Pool Size	Min. pool width at floor	Cable Length	Debris Canister porosity	Suction Rate	Motor Unit Voltage	Power Supply Rating
RT	1.5hr	Yes	80m <sup>2</sup>	3.5m	18m	Down to 2 micron	16m <sup>3</sup> /hr	24 VDC	IP54

## Warranty

The RT Residential pool cleaner is covered by a 3 year warranty
